PROFESSIONAL SUMMARY

Results-driven QC Tester with expertise in manual testing, web application development, and database management. Proficient in Python, Django, and PostgreSQL. Proven track record of identifying UI and functional defects, and delivering high-quality software products through thorough testing and collaboration with development teams.

TECHNICAL SKILLS

Python • C • Java • JavaScript • Django • React • Node.js • Express.js • HTML • CSS • PostgreSQL • MySQL • Manual Testing • Website Quality Control • Bug Reporting • Test Planning • Test Case Development • Cross-Browser Testing • Database Management

WORK EXPERIENCE

QC Tester Intern — Jan 2025 - Apr 2025

Biaruha Tech

- Designed and executed comprehensive test plans for 3 different websites, ensuring thorough testing of UI and functional aspects. Identified and reported UI and functional defects to developers, resulting in improved product quality. Conducted cross-browser testing and verified overall website performance, ensuring seamless user experience across various browsers and devices.

Full-Stack (MERN) Developer Intern — Jan 2025 - Apr 2025

Biaruha Tech

- Developed a web-based hospital management system using React.js, Node.js, Express.js, and PostgreSQL, with a focus on scalability and maintainability. Implemented backend APIs for patient management, billing, and HR modules, ensuring seamless integration with front-end components. Collaborated with the front-end team to integrate server-side logic, resulting in a robust and efficient system.

Relationship Officer (RO) — 2020 - 2022

Manappuram Finance, Calicut

- Handled client relationships, financial documentation, and account management, ensuring excellent customer service and improving customer satisfaction by 20%. Utilized strong communication and interpersonal skills to resolve customer queries and concerns, resulting in increased customer loyalty and retention.

PROJECTS

PC Assembler (Django)

Developed a web application where users can customize and assemble PCs.

Library Management System

Built a tool for students to manage and borrow books digitally.

Hospital Management System (Live Project)

Designed modules for patient management, billing, and HR.
